Answer Key
immediately preceding term is always same. Let us see here, $a_2 - a_1 = 1$
 $a_4 - a_2 = 2$ $a_7 - a_4 = 3$ $a_{11} - a_7 = 4$ Here the difference is continuously increasing. Hence, it is not an arithmetic sequence. Note: In a geometric sequence, the ratio of a term to its immediately preceding term is always
