Borland Database Engine (free version) download for PC
Windows 7 and 8 can be very restrictive towards applications written for the previous versions of Windows. This is the case with the Borland Database Engine (BDE), which is not capable of running in Windows7/8 unless one setting has been changed: A permission for the BDE must be given in the windows registry database. Configure the permission for the BDE in the registry. Make sure you are logged into your Windows7/8 machine with an administrator account. Then follow these directions:
