Gen III/IV engines are typical V-8s with respect to the cooling system, so they do not require huge radiators or special metals. What they do require is a radiator that is rated for the job. With the smallest LS engines easily making 300 hp, you don't want to use a stock 4-cylinder or V-6 radiator.

Firebird and Camaro LS Swap: Cooling System Guide. November 14, 2016 by LS Engine DiY. A high-performance LS engine generates much more heat than a Chevy Gen I small-block engine or a Pontiac V-8 that originally came in many of the F-Body cars, so you need a cooling system that effectively and efficiently dissipates and manages the heat. Therefore, you need the correct components, adequate capacity, and proper calibration for the high-performance engine you have installed in your F-Body.
